ABOUT ME

I am a Computer Engineering graduate and experienced software engineer with over three years in the field. Passionate about problem-solving, I have a results-driven mindset and a strong focus on building efficient and scalable solutions. Beyond work, I enjoy long walks and runs to stay active and follow Formula 1 in my free time. I am currently seeking a software engineering role where I can contribute my expertise while continuously learning and growing.

EDUCATION

Lebanese University - Faculty of Engineering

Computer and Communications Engineer - Top 5%

Delf

B2

Roumieh, Lebanon

Sept. 2019 – June 2024

Sept. 2021

EXPERIENCE

Murex - Lebanon (On Site) | External Full Stack Developer via Sequel

May 2025 – Present

- Applied expertise to ensure adherence to best practices, fostering clean, maintainable, and efficient code.
- Contributed as a key member of a cross-functional team, consistently delivering results and meeting project deadlines.
- Developed and implemented new full-stack features for the website, from conception to deployment.
- Ensured proper application testing through comprehensive unit and end to end tests.

Cash My Stock LLC FZ - UAE (Remote) | Full Stack Engineer

December 2023 – April 2025

- Led development efforts, collaborating with team members to plan and deliver new features efficiently
- Enhanced SEO performance by implementing pre-rendering, leading to significant improvements in search rankings
- Developed real-time auction systems using modern technologies for seamless bidding experiences
- Managed CI/CD pipelines, overseeing releases, maintenance, and automation for streamlined deployments
- Upgraded Angular frameworks across multiple projects, successfully migrating from Angular 12 to 17
- Set up and integrated Odoo for marketing automation, enabling targeted campaigns and streamlined customer engagement
- Created Dashboards and Reports for business analytics using Power BI
- Continuously developed new features in Angular and Node.js to enhance platform functionality and user experience

Globalistic Tech - Lebanon (On Site) | Junior FullStack Developer

September 2022 – December 2023

- Developed new features for a B2B full-stack web application with Angular
- Developed REST APIs using NodeJS and HapiJS to manipulate data (PostgreSQL, Sequelize)
- Oversaw back-end development to maintain website integrity, security and efficiency
- Provided support and maintenance for the application
- Resolved system test and validation problems to provide normal program functioning
